2016 FORMULARY

MAIL ORDER AVAILABLE FOR CERTAIN PRESCRIPTIONS

FORMERLY

Your formulary utilizes a Pharmacy and Therapeutics Committee (P & T Committee), made up of practicing physicians, pharmacists, and nurses to help ensure that our formulary is medically sound and that it supports patient health. This committee reviews and evaluates medications on the formulary based on safety and efficacy to help maintain clinical integrity in all therapeutic categories.

## FORMULARY DESIGN

Optum has chosen a closed formulary structure for our Essential Health Benefits Formulary. The formulary structure features generics, preferred and non-preferred brand-name drugs, specialty drugs, oral chemotherapy drugs, and ACA (Affordable Care Act) preventive drugs. A closed formulary limits coverage to only those products listed in these levels. Products not listed on the formulary are generally not covered.

- *Generic drugs:* Most generic drugs are listed under “GENERIC”. Drugs listed under “GENERIC” have the same active ingredient as the brand-name versions but at a lower cost.
- *Preferred drugs:* Drugs listed under “PREFERRED” include preferred brand name drugs that will generally have lower co-payments than non-preferred brand name drugs.
- *Non-preferred drugs:* Drugs listed under “NON PREFERRED” generally have higher co-payments than preferred brand name drugs.
- *Specialty drugs:* Drugs listed under “SPECIALTY” generally have the highest co-payment and cost. Specialty drugs are prescription medications that are sometimes used to treat complex and chronic conditions. They may require special monitoring or handling.
- *ACA preventive drugs:* Drugs listed under “PREVENTIVE” may have coverage and no co-payment when health care reform requirements are met for age, gender, and/or risk factors.
- *Oral chemotherapy:* Drugs listed under “ORAL CHEMO” may have a designated copayment or co-insurance specific to these products based on state laws surrounding oral chemotherapeutic agents.

## REASONABLE MEDICAL MANAGEMENT

Optum's formulary also uses medical and utilization management functions to determine whether a prescription is medically necessary. These industry recognized and accepted management functions include but are not limited to quantity limits, step therapy, and prior authorization and help Optum and its clients determine whether the prescribed medication was prescribed in accordance with generally accepted medical practice standards, is clinically appropriate, and confirm that the prescribed medication is not more costly than an alternative product that is as likely to produce therapeutically equivalent results. As recommended by the United States Department of Labor, Optum's reasonable medical and utilization management functions apply to ACA preventive drugs.

## USING THIS FORMULARY REFERENCE GUIDE TO HELP CONTAIN COSTS

Many health plans use the Optum formulary to help manage the overall cost of providing prescription drug benefits. This formulary offers a wide range of medications from which to choose. We realize that this formulary reference guide may not include every drug from every manufacturer. **However, choosing a generic or preferred drug when it is appropriate can provide access to the necessary medications to stay healthy, at a cost that is more affordable.**

## SAVING ON OUT-OF-POCKET COSTS

Your health plan sets the co-payments for each formulary drug status which include oral chemo, generic, preferred brand-name, non-preferred brand-name, and specialty medications. Co-payments and deductibles for preventive products follow health care reform rules. Health plans often design prescription drug plans to encourage the use of generic and preferred brand-name drugs. Choosing non-preferred drugs (or specialty drugs) may mean paying higher out-of-pocket expenses (such as coinsurance, co-payments, and deductible amounts) or not receiving coverage at all. Patients may also pay less for generic drugs.

**PLEASE NOTE: Brand-name drugs may become non-formulary if a generic version becomes available.**

## CONSULTING THE PRESCRIBER'S OFFICE WHEN APPROPRIATE

When employers and other health plans design their prescription drug plans, they may choose to provide coverage only for certain medications, time periods, doses, quantities, or for a specific indications (e.g. they may exclude coverage for medications

for unapproved, unproven, or cosmetic indications). When coverage for medications is provided based on use or quantity, your pharmacy benefit may contact your prescriber's office for additional information to determine whether coverage is available under your plan. Patients who are unsure whether these coverage rules apply for a particular medication can consult their prescription drug benefit manual or contact a Member Services representative to determine specific coverage requirements.

## **KNOWING HOW THE FORMULARY INFORMATION IS ORGANIZED**

The following formulary reference guide is designed in the following order: oral chemo, generics, generic preventive, preferred brand name, non-preferred brand name, brand name preventive, specialty drugs. In addition, immediately preceding the index is a section listing ACA preventive drugs by category.

OptumRx specializes in the delivery, clinical management and affordability of prescription medications and consumer health products. We are an Optum™ company — a leading provider of integrated health services. Learn more at [optum.com](http://optum.com).

\*Formulary Disclaimer: Coverage for some drugs may be limited to specific dosage forms and/or strengths. The benefit design determines what is covered and the applicable co-payment. The medications listed on this formulary are subject to change pursuant to the formulary management activities of Optum. The presence of a medication on this formulary list does not guarantee coverage.
