

Provider Online Search Tool Guide

We want to make sure that you find the physicians, providers, and facilities in CGHC’s network, so we have provided some information to help you use CGHC’s on-line provider directory search tool.

Within the on-line searchable directory, on the “Advanced Search” page, you can search by Provider Type, Specialty, Practitioner Name, Group Name, Office locations, Gender, Languages Spoken, Accepting New Patients, physicians affiliated with select in-network hospitals, as well as providers who are Board Certified in their specialty.

CGHC’s Practitioners and Providers are organized by the following “Provider Type” categories: Hospitals, Behavioral Health, Clinics, Physicians, and All Other (such as Home Health and Ambulatory Surgery Centers – see below for full list).

Below is a table of the specialties found in each of the “Provider Types” to help you can find the information you are looking for.
